

PREPARATION AND USES OF LOS-DEPLETED OUTER MEMBRANE
PROTEINS OF GRAM-NEGATIVE COCCI
ABSTRACT OF THE DISCLOSURE

Described herein is a method for removing toxic lipooligosaccharide (LOS)
5 from outer membranes of Gram-negative cocci, such as *Neisseria meningitidis*.
LOS-depleted outer membranes and LOS-depleted soluble outer membrane
proteins can be prepared, which are able to elicit bactericidal antibodies against
homologous strains of bacteria. Vaccines and other uses of the preparations are
further described.
